### About the Media Center:

The Digital Media Center at the Anderson Academic Commons is a self-service, post-production studio open to students, faculty, staff, and alumni. The center gives access to commercial programs and is accessible to beginner and advanced users. The facility features fourteen 27-inch Mac backlit computers equipped with cameras and the necessary audio equipment for production. Media kits are also available to members of the DU community for borrowing.

A key value of the Digital Media Center is the empowerment of all users to become independent and proficient in high-end professional production and editing applications that will enhance their skill sets. Workshops are held in the center, and tutorials are available through our portfolio page to assist in the use of our featured software. Classes are available and can be scheduled upon request.

Visit [portfolio.du.edu/media](http://portfolio.du.edu/media) for tutorials. Email [AAC-DMC@du.edu](mailto:AAC-DMC@du.edu) for more information about workshops and class scheduling.
